DETAILED ACTION

Response to Amendment

The amendment filed on August 30, 2006, has been entered and acknowledged by the Examiner.

Claims 13 and 15-26 are pending in the instant application.

Allowable Subject Matter

Claims 13 and 15-26 are allowed.

Regarding independent claim 13, the references of the Prior Art of record fail to teach or suggest the combination of the limitations as set forth in claim 13, and specifically comprising the limitation wherein a method for manufacturing a diode device comprising a housing whereby a length of the housing may be modified to adjust the distance separating electrodes at opposite ends of the housing, and wherein the housing comprises a tubular actuating element, comprises the steps of contacting a first composite to one end of a tubular actuating element, introducing an electrically conducting material to an inner surface of the composite, contacting a second composite to the opposite end of the tubular actuating element, wherein the composite is a matching electrode pair precursor comprising a silicon wafer, a layer of titanium, a layer of silver and a layer of copper, such that an inner surface of the second composite is also in contact with the electrically conducting material, sealing the contact between the first and second composites and the tubular actuating element, and separating the

second composite along a boundary between two different layers to form two matching electrodes.

Regarding claims 15-26, claims 15-26 are allowable for the reasons given in claim 13 because of their dependency status from claim 13.
